

WPC (Wood Plastic Composite) Doors

This particular range of products is made from a new revolutionary product (WPC) which is made entirely from recycled products.

It is environmentally friendly as it emits almost zero emission making it one of the safest products to use.

It is Weatherproof and Waterproof which makes these Doors stronger and more stable than traditional Doors.

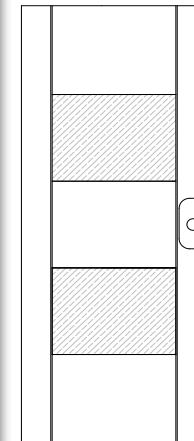

These Doors are particularly suitable for external/internal application especially where exposure to the elements and ongoing maintenance is an issue.

The unique system has been designed in Australia to meet our stringent Standards. The Door system is manufactured by our manufacturing partners overseas.

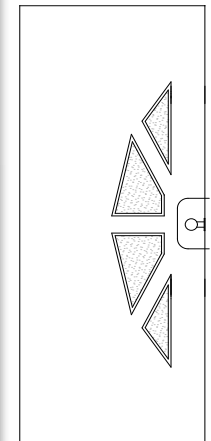

Available in a number of finishes like Spray Painted system or Laminated PVC Veneer, or can be supplied Raw for onsite painting.
